

The following are Williamstown ATV trails committee communications received by committee chair Rama Schneider via email from 11/05 through 12/13/19.

Good Evening,

I am a Williamstown tax payer and a strong supporter of an ordinance to open select roads for ATV use. This is just a start, The main objective will be to create a route that uses less and less roadways in the future. This gives the club an opportunity to show the town that ATV riders care about our town. We are respectful and help care for the trails and the roads we use.

My family has gone on many rides and we always ride with other families. Most everyone you pass on the trails include children hanging with their parents or grandparents. We are just people enjoying the outdoors and all Vermont has to offer. Thank you all for your hard work and consideration!

Best,
Sheena Pierce

Thought I would send an email as well as have talking to you on the phone.

Will ATV have a state inspection sticker
Will ATV be insured
Most ATV don't have speedometer or directionals etc
Modified exhaust muffler systems/noisy
No airbags/no protection really from a vehicle
I don't think we should be sharing town/public roads.

Regards
Resident 264 South Hill
David Fowler

Just a couple of thoughts on the proposed atv trail system.
Washington trails close prior to Oct 15. Trail closure should coincide with the Washington trails or issues will arise with riders crossing onto their trail system. They should close prior to deer hunting which was Oct 5 this year for bow season. I think Washington trails closed Labor Day weekend this past year
I would support a 10 p.m. closure instead of 11 p.m
Also wondering where the trails connect to Washington. The proposed map does not show termination points or where the trails connect to Washington
